I may need your help adding in details and insuring that your comments are placed in the right spot.

Exemption 5 (deliberative process)

I'll be back tomorrow morning to work on the second half of the "Initial Comments."

Can you look at what I've polished so far and be a second eye?

Also, I've been trying to add in your comments, where they were different from write-ups already in the "Initial Comments" – but in some instances, I'm not sure where they fit with the line item approach taken in the draft. Can you redline into the document so I know where you think they fit? Or call me and we can work on it together. (BTW: The "Initial Comments" includes comments you and Pat and Maureen and Margo provided during the meetings and calls we've had this month. I've been taking notes and using them to create this document.)

Thanks for anything you can do. Not sure when you get in, but I'll be in around 9. I think I can get a polished attachment out for review for Kara, Harish (if he is in), you, and Ken by 11 and work on the letter to refer to it and to include disclaimers and reference to future consultation with ASTDR. Hopefully, JE will accept it in the form provided. My guess is that all that can be accomplished and processed by 3. I may involve Geoff Garrison as well, given that the document will become FOIAble.

Let's talk in the morning.
